

Bulletin 308

Removal of Dust Ejector System and Adapter for the Installation of the Series 9000[™] Air Precleaner on the Volvo L330

1. Remove rain cap.
2. Disconnect clamps at dust ejector and at muffler and remove crossover tube.
3. Fit rubber sleeve over end of muffler crossover port and clamp.
4. Loosen clamp that holds dust ejector body to the air filter housing.
5. Remove dust ejector from the filter housing.
6. Fit expansion adapter onto filter housing and use the original clamp from the dust ejector.
7. Install precleaner onto expansion adapter.

WARNING! Do not attempt to install, remove, or inspect unit while engine is running. Do not insert objects into open areas while in operation.
