Sy-Klone International's Toxic Substances Control Act (TSCA) Compliance Declaration

Sy-Klone International's products are generally complex objects, comprised of components from multiple suppliers, and the individual components often include multiple articles. This statement confirms that Sy-Klone International is aware of the requirements imposed by the Toxic Substances Control Act. To Sy-Klone's best knowledge and belief, based on active due diligence in the supply chain discipline and information/certification requested/required from our suppliers, none of the restricted materials subject to the Toxic Substances Control Act as listed below, are added to, or used in the construction of, Sy-Klone's products.

In providing this information, Sy-Klone International is relying on its material suppliers for declarations, certifications, notifications and/or available material safety data sheets (MSDS) regarding the materials within the products being supplied by Sy-Klone and the materials used in the production of those parts. We have not conducted independent tests to determine the presence of the regulated substances and Sy-Klone makes no warranties, express nor implied, and assumes no liability related to any use of this information. All information is provided to the best of Sy-Klone's knowledge using the raw material documentation available from raw material suppliers. In the event Sy-Klone obtains additional information, which is inconsistent with this Declaration, it will amend this Declaration accordingly. In the event more information is required, we would suggest that appropriate analytical testing be conducted. The information in this Declaration should only be used for environmental, health and safety purposes.

Restricted Materials:

Decabromodiphenyl ether (DecaBDE)
Phenol, isopropylated phosphate (3:1) (PIP (3:1))
2,4,6-Tris(tert-butyl) phenol (2,4,6-TTBP)
Hexachlorobutadiene (HCBd)
Pentachlorothiophenol (PCTP)
